

hansgrohe

**hansgrohe
ExcellentFit**

Find the perfect
faucet to
create the best
experience for
any sink

[hansgrohe.com](https://www.hansgrohe.com)

Your bathroom should be as unique as your personality. Of course, we would always recommend hansgrohe as your first choice, but we want to make it as easy and pleasant as possible for you to get started with our exciting world of products. That's why we use our ComfortZone test to regularly check which brands of sinks are a particularly good match for our products.

In this ComfortZone Test, we tested and measured the most important sinks from Duravit with our faucets to give you our expert recommendation.

The ComfortZone Test

More comfort

Does the faucet-sink pairing provide enough usable space? We position a test piece between the faucet and sink to see if it's possible to wash your hands comfortably.

Less splashing

Does the water splash when the faucet is operated? By opening and closing the mixer with differing water pressures, we observe patterns and collect data that are then evaluated.

Fewer water stains

Does the water splash when you wash your hands? We pass a standardized hand model back and forth under the stream of water and observe and evaluate the data and patterns outside the basin.

Note on assembly

In the following illustrations, you will find important information to keep in mind when installing your hansgrohe faucet on your favorite sink. The letters in the graphics indicate the relevant points for measurement. The dimensions in the tables indicate the corresponding distances between the faucet and the washbasin.

If you have some flexibility in the position of the faucet, please consider these dimensions for a professional installation.

When taking measurements, please note:

If you are incorporating a build-in sink or a sink above the counter, use the outer edge of the sink as a reference point. If, on the other hand, you are incorporating a sink under the counter, use the inner edge of the basin as a reference point.
